Recharge & Withdrawal

- **Recharge:**

1 USD = 10,000 coins

- **Withdrawal:**

10,000 points = 1 USD

- **Gift Revenue Share:**

Hosts receive 70% of the gift value.

Example: If a gift is worth 10,000 coins, the host gets 7,000 points

1. Agency Commission

Agency Commission = Commission Rate * Total Gift Income of All Hosts (Platform rewards like rankings and tasks are not included.)

Agency Commission		
Level	Total Valid Income (Past 30 Days)	Commission Rate
D	0 - 2M	4%
C	2M - 10M	8%
B	10M - 50M	12%
A	50M - 150M	16%
S	150M+	20%

M= million, 10,000 points =1 USD

Important Notes:

1. Total Valid Income = Your agency income + Each tier of your sub-agencies' income
2. Agency commission is added in real time when a host receives a gift.
3. The minimum withdrawal amount is 10 USD, and withdrawals must be in multiples of 10 USD (like 10, 20, 30, 40, etc.).

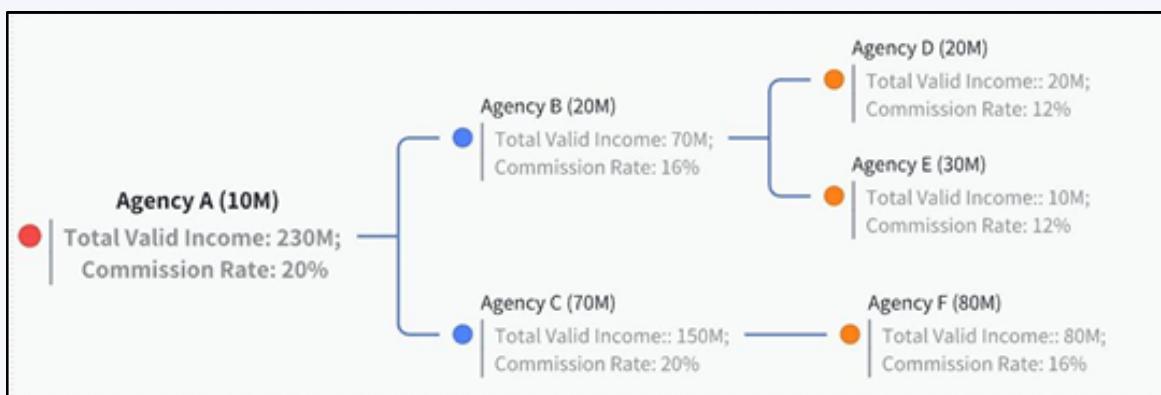

2. Sub-Agency Commission

The main agency can earn commission from its sub-agencies (T1, T2, T3, etc.).

The maximum commission rate from sub-agencies is 16%.

For Example:

- Agency A invites Agency B and C
- Agency B invites Agency D and E
- Agency C invites Agency F

(Note: figures in brackets represent the income of hosts under each agency)

The main agency earns the **difference between its commission rate and the sub-agency's rate**, multiplied by the sub-agency's total income.

Examples:

Agency A's total valid income = A + B + C + D + E + F =
 10M + 20M + 70M + 20M + 30M + 80M = 230M

Agency A's commission rate = 20%

Agency B's total valid income = B + D + E = 20M + 20M + 30M = 70M

Agency B's commission rate = 16%

Agency C's Total valid income = C + F = 70M + 80M = 150M

Agency C's commission rate = 20%

Agency D's Total valid income = 20M

Agency D's commission rate = 12%

Agency E's total valid income = 30M

Agency E's commission rate = 12%

Agency F's total valid income = 80M

Agency F's commission rate = 16%

Sub-agency Commission = (Main agency commission rate - Sub-agency commission rate) * Total Valid Income of the sub-agency

- **Agency A from Agency B:**

$$(20\% - 16\%) \times (20M + 20M + 30M) = 2.8M = \$280$$

- **Agency A from Agency C:**

$$(20\% - 20\%) \times (70M + 80M) = 0$$

- **Agency B from Agency D:**

$$(16\% - 12\%) \times 20M = 0.8M$$

- **Agency B from Agency E:**

$(16\% - 12\%) \times 30M = 1.2M$

Total = **2M = \$200**

- **Agency C from Agency F:**

$(20\% - 16\%) \times 80M = 3.2M = \320

Since Agencies D, E, and F have no sub-agency, they cannot earn sub-agency commissions.
